

BOLLINGER MOTORS

Mechanical Engineer – Automotive Interior Lead

Bollinger Motors is looking for a full-time Lead Interior Engineer to work on the design and integration of an all-electric vehicle with our team of engineers in the Detroit, MI area. In this role, you will lead the Interior engineering team to design and develop Interior components/systems from initial concept to vehicle launch. Job duties to be performed in the Detroit, MI area. Compensation based on experience and abilities.

Essential Duties & Responsibilities

- Lead development of interior lighting systems
- Lead development of instrument panel systems
- Lead development of H-point and occupant packaging
- Lead development of seating & harness systems
- Lead development of audio systems
- Lead development of new design concepts from idea to implementation on production vehicles
- Apply knowledge of engineering principles and practices to assigned tasks in the design, development, analysis and release of products and subsystems
- Verify design using analysis and or functional testing, interpret results, drive decisions, and assess risk
- Responsible for accuracy of detail drawings directly or as collaboration with designers
- Identify and assess possible suppliers for production of products
- Work with other functional areas within the vehicle development team to ensure that all vehicle interfaces are defined and supported
- Create and maintain component and system DVP&R
- Create and maintain system EBOM
- Support vehicle testing, rig testing, and Hardware-In-the-Loop simulations to demonstrate system functionality
- Manage system quality, cost and timing to ensure high quality program deliverables
- Support vehicle prototype builds as needed.

Education, Skills and Knowledge

- Bachelor's Degree in, Mechanical Engineering, Aerospace Engineering or related degree
- 5+ years relevant direct automotive interior experience required
- Working experience with EV technology
- Experience with FMEA and related quality assurance processes
- Working experience developing occupant packaging
- Working experience developing Instrument panel systems
- Working experience developing seating systems
- Working experience developing interior lighting systems
- Outstanding leadership and communication skills
- Experience with regulatory compliance testing
- Experience managing external suppliers and contractors
- Substantial background in designing complex parts required
- Working knowledge of Solidworks and Solidworks Simulation tools
- PLP/GD&T, dimensional tolerance stack-ups and experience with engineering standards required
- Creative, innovative, decisive, and prone to action
- Excellent verbal and written communication skills
- High level of people skills, able to work in a team environment
- Participation in SAE Collegiate Design Series highly preferred
- Microsoft software including Excel, Word, Outlook and PowerPoint
