

BOLLINGER MOTORS

Buyer - Chassis & Drivetrain

As a Chassis & Drivetrain Buyer - you will manage the Purchasing life cycle of all production parts for the Chassis & Drivetrain Commodity Group across various projects. Responsibilities will include (but are not limited to) the procurement of Motor & Inverter Assemblies, E-Axles / Transaxles, Hubs, Driveshafts, Braking and Suspension System Components, CNC machined and fabricated parts. The role requires exceptional communication, negotiation, and organizational skills. A successful candidate needs to thrive in a pressurized environment using data and facts to help identify risks, manage resources, and solve problems quickly and effectively. A strong team ethic with the ability to interact at all levels and across business boundaries is required to be successful in this position.

Essential Duties & Responsibilities

- Development of procurement strategy, establishment of purchasing budgets, plans, policies, systems, and procedures within the organization.
- Building and developing supply chain organization to support vehicle projects and ongoing cost reduction activities.
- Negotiate key contracts to optimize value, using knowledge of Chassis and Drivetrain systems costing.
- Develop business intelligence based on continuous market analysis, monitoring, and forecasting against variable market conditions.
- Negotiate contractual terms and interpret existing contract frameworks, demonstrating an understanding of legal principles.
- Build internal relationships, assessing the capabilities of suppliers.
- Create supplier scorecards to drive for continuous improvement and creation of best practice-based processes and procedures.
- Program gateway delivery and reporting
- Product definition, attributes, and specification cascade for sourcing activities
- Program metrics generation, including timing, delivery status, cost status.

Education, Skills and Knowledge

- Bachelor's degree in supply chain management, or related subject (or equivalent)
- In depth knowledge of vehicle electrical and electronic systems and components from a strategic purchasing perspective
- PLEX experience.
- Strong Excel Skills
- Knowledge of relevant automotive industry standards such as: ISO 9001, TS16949, ISO2600/20400
- Proficient in the application of vehicle project management strategies
- Experience in the application of PPAP processes in the supplier base
- Problem solving; 8D, Practical problem-solving capability.
- Proven track record of working within automotive organizations.
- Superior relationship skills in creating and fostering working relationships within Purchasing, internal business areas and supplier.
- Strong leadership and negotiation skills
