In this role, you will lead and resolve cross-functional commercial, manufacturing, and technical issues in a proactive manner both within the company and with external partners and vendors. This position reports to the Chief Product Officer and is an in-person role at the company's Oak Park, MI headquarters.

Essential Duties & Responsibilities

- Drive the daily activities to meet overall program objectives and focus on process within product definition and engineering design cycles.
- Schedule and lead program cadence meetings to report out on program status
- Develop project timing plans, lead, track, and report progress to plan and drive solutions to address any identified gaps.
- Support prototype builds, testing, and validation to meet production timing.
- Interface with purchasing on suppliers and product research.
- Identify and prioritize project tasks and risks, drive engineering discussions and decisions on critical system parameters.
- Communicate status and big picture to the project team and executive management.
- Identify multi-functional design dependencies and risks.
- Influence and negotiate project architecture and design with system teams to ensure proper scoping.

Education, Skills and Knowledge

- Bachelor's degree in Business, Program Management, or equivalent; MBA preferred
- 7+ years automotive management, supply chain, and/or engineering experience
- Knowledge of automotive and commercial vehicle components
- Knowledge of electric vehicles, electrical and battery systems strongly preferred
- Leadership experience at automotive Tier 1 suppliers preferred
- Experience with Dassault Systems 3DX/ENOVIA is preferred
- Proficient in Microsoft Project, Excel, and Office applications
- Ability to engage with suppliers and build relationships
- Ability to evaluate potential program risks and recommends solutions
- Ability to work within aggressive deadlines and manage multiple projects and tasks simultaneously
