

## **Fabricator Technician**

Bollinger Motors is looking for an experienced Fabricator Technician to work closely with engineering in the shop in the metal fabrication, vehicle development, complete vehicle builds, vehicle mechanical support, and R&D for the Company's internal needs. In this role, you will support the prototype, testing, and R&D needs for part fabrication, fixturing, light machining, mechanical assembly and teardown, mockups, test benches, etc. to be able to support all aspects of product development. This position reports to the chief operations officer and is an in-person role at the company's Oak Park, MI headquarters.

## **Essential Duties & Responsibilities**

- Plan and coordinate the sequence of various work operations to complete projects efficiently, on time and with quality.
- Determine and perform machining, fabricating cut and weld, concept and pre-production builds, and assembly necessary to complete jobs.
- Use all aspects of fabrication shop machinery, methods, and knowledge of industry standards.
- Surface plate builds of complete or partial vehicles.
- Technician support of builds including mechanical, electrical, assembly and tear down, prototype projects, when needed
- Work closely with engineering team for R&D, prototyping, and production support.
- Work with suppliers and support manufacturing.
- Ensure the shop is clean and orderly and a safe environment.
- Work with engineering for feedback on part feasibility as needed.
- Ensure that all projects are delivered on time, within scope and within budget.

## **Education, Skills and Knowledge**

- 7+ years' experience in metal fabrication.
- 5+ years of mechanical builds.
- Ability to read prints, understand GD&T, and use CAD.
- Minimum high school diploma or equivalent.
- Basic knowledge of gauges and measurement equipment.
- Knowledge of mechanical tools and processes.
- Must be able to lift heavy objects, occasionally up to 75 lbs.
- Able to work in a startup environment, be flexible, and work hours as needed.
